Hyderabad, Telangana | +91 9701420044 | htanmai23@gmail.com |LinkedIn |GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with a B.Tech in Information Technology (2023) and hands-on experience building full-stack applications using React.js, Node.js, Express.js, MongoDB, Java, and Spring Boot. Skilled in REST API development, JWT authentication, database management, and application integration. Experienced in building AI-powered applications using Google Gemini API, LangChain, and Retrieval-Augmented Generation (RAG). Familiar with Docker, GitHub Actions CI/CD, API testing using Postman, and application troubleshooting. Strong foundation in object-oriented programming, software development, debugging, and problem-solving.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+), SQL, C, Python (Basics)
Frontend Development: React.js, HTML5, CSS3, Axios, Responsive UI Development
Backend Development: Node.js, Express.js, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, RESTful APIs, JWT Authentication, Middleware
Databases: MongoDB, Mongoose, PostgreSQL, MySQL, Qdrant (Vector Database)
AI & Generative AI: Google Gemini API, LangChain, Retrieval-Augmented Generation (RAG), Vector Embeddings, Semantic Search, Prompt Engineering
Testing & Automation: Manual Testing Fundamentals, Selenium WebDriver (Currently Learning), Java, JUnit (Basic), Postman, REST API Testing, Test Case Design, Positive and Negative Testing, SDLC, STLC, Debugging, Application Troubleshooting
Tools & DevOps: Git, GitHub, Docker, Docker Compose, GitHub Actions, CI/CD, Netlify, Render, Vercel
Core Concepts: Object-Oriented Programming (OOP), DBMS, MVC Architecture, Authentication and Authorization, IoC, Dependency Injection

PROJECTS

E-Commerce Application *Java 21 | Spring Boot | Spring Security | JWT | Spring Data JPA | PostgreSQL | React*

- Developed a full-stack e-commerce application featuring product browsing, category filtering, live product search, and shopping cart functionality.
- Built REST APIs using Spring Boot, Spring Data JPA, and PostgreSQL for product and user management.
- Implemented JWT-based authentication, BCrypt password hashing, and role-based authorization for USER and ADMIN accounts.
- Developed profile management and admin user-management features using DTOs to control API response data.

GitHub | Live Demo

SMART – Study Material, Assessment and Resource Tools *React.js | Node.js | Express.js | MongoDB*

- Developed a full-stack Railway Institute Document Management Portal to centralize training manuals and learning resources.
- Built RESTful APIs with complete CRUD functionality, category-wise organization, and search across resources.
- Deployed for real-world use at Zonal Railway Training Institute (ZRTI), actively used by trainees to access training materials.

GitHub |Live Demo (Trainee)

DocuChat AI – RAG-based PDF Q&A System *React.js | Node.js | LangChain | Google Gemini API | Qdrant | MongoDB*

- Built a full-stack Retrieval-Augmented Generation (RAG) system enabling users to upload a PDF and ask natural-language questions answered from its content.
- Built a document ingestion pipeline with LangChain's PDF loader and RecursiveCharacterTextSplitter (1000-character chunks, 200-character overlap) for accurate retrieval.
- Generated vector embeddings with the Google Gemini API and stored them in Qdrant, retrieving the top-3 most relevant chunks per query via semantic similarity search.

GitHub| Live Demo

Book Catalog API – API Testing *Postman | REST APIs | JavaScript | JWT*

- Designed and executed positive and negative test cases for user authentication and Book Catalog REST APIs.
- Tested CRUD operations and validated HTTP status codes, response payloads, headers, error handling, and authentication.
- Created JavaScript assertions in Postman to validate API responses and organized test scenarios into collections.

GitHub

TRAINING & PROGRAMS

Full Stack Web Development Internship Training Program | Cuvette Tech Pvt. Ltd. | 2025–2026

- Completed training in full-stack web development using the MERN stack .
- Implemented JWT authentication, role-based authorization, and version control workflows using Git and GitHub.

Pre-Onboarding Trainee | Brillio (LBJ) | 2023–2024

- Completed the Learn Before Joining Program and collaborated in a 4-month internal hackathon, securing 2nd Runner-Up in Sparxelerate.

EDUCATION & LEADERSHIP

B.Tech – Information Technology, Anurag Group of Institutions (2019–2023) | CGPA: 8.84

Class Representative | Department Head – Tech Fest | Event Lead – CodeChef Chapter
